

Success Stories

ETHANOL PLANT SAFETY AUDIT AND SOLUTIONS

APPLICATION

- An Ethanol plant was having issues with various safety related items at their location. Wells Brothers, Inc. performed a safety walk thru audit with the plant engineer helping to identify various safety issues and then proposed solutions.

SOLUTION PROVIDED

- Well Brothers, Inc. helped to identify over 50 areas for improvement. WBI engineering then designed, fabricated and installed the various solutions.
- Created a safety matrix with improvements and corrective action for future safety audits

Safety Gate Around Motor

Guarding Around Motor Shaft

Safety Cross Over for Auger Conveyor

LONG-TERM OUTCOME

- Plant has now identified and corrected some serious safety issues
- Much safer environment for employees
- Wells Brothers, Inc. obtained two new long-term customers for future projects
