

## APPLICATION

- The Automated assembly cell included a Motoman Robot, a Multipress Press, automated servo feed tables and some standard feed conveyor.
- The customer had a need for controls and panel build to automate a cell that applies adhesive to complete an automotive assembly.
- PCI was contacted to build the control panels.

## SOLUTION PROVIDED

- Panel Control built the controls panels but was also able to provide a total turn-key solutions by combining the capabilities of PCI with their sister company, Wells Brothers, Inc. By combining resources, we were able to do the complete installation from start to finish.
- Work Provided by Panel Control, Inc., and Wells Brothers, Inc.

<ul style="list-style-type: none"><li>• <i>Main Control Panel for the robot cell</i></li><li>• <i>All field wiring from devices back to the control panels</i></li><li>• <i>HMI Panel for over all control</i></li><li>• <i>All 480 Volt power drops to cell</i></li></ul>	<ul style="list-style-type: none"><li>• <i>Install and hookup of new compressor</i></li><li>• <i>Fabrication and installation of the robot cell</i></li><li>• <i>Installation of the Motoman robot</i></li></ul>
--	--

## LONG-TERM OUTCOME

- Client obtained a new solutions provider for turn-key installation.
- Panel Control, Inc and Wells Brothers obtained a new long term client and opportunities both with Motoman and Multipress for future controls and installation opportunities.

**“Quick Turnkey Solutions From  
a Cost-Effective Single Source Provider.”**
