One Contractor. One Team. Done Right.

We Don't Just Install Equipment—We Deliver Solutions.

Applications

Wells Brothers helped to support bringing in 8 new blow molding lines. The project consisted of unloading and set the blow mold machines and all downstream equipment, set and install chillers and compressors, run all the stainless steel piping and power to all equipment, pneumatic convey, and color feeders.

Solution Provided

The project had a very tight timeline in order to meet the requirements of the contract. The building was just being completed and we had roughly 3 months to get the equipment and utilities installed. By coordinating closely with the OEM, city, and local utilities, we were able to meet the targets.

Long Term Goals

The customer was able to satisfy their contract and even picked up a new customer right next door to their new facility that led to Phase II which included three more lines.
